Important Customer Notes:

* The sensitivity stated above is the full sensitivity without Boost function that was achieved as per factory settings and conditions. This sensitivity data is presented as a general guide, actual achievable sensitivity will depend on the customer product, size, type, packing and operating environment. Post shipment actions such as installation, customer use and servicing may affect the performance of the metal detector if not performed correctly by a competent person in accordance with manufacturer's recommendations. To that effect METTLER TOLEDO Safeline Ltd recommends that any servicing is carried out by an authorised METTLER TOLEDO representative.
