

Manuals Parts

Location : 5940
Order nr. : 106815
Machine nr. : 2015050036
FO nr. : 783538
Machine name : Tail Feather Puller
Date : 27 May, 2015

Description & Usage of the part manual

This manual consists out of Part list tables and associated Drawings.

Tables with parts.

Meyn machines are modular designed. A Part-manual starts with the top-module working its way down to the separate components (top-down). The table beneath the module-number sums up the essential parts of this module.

Pos.	Part position number in the drawing.
Article nr.	The part number used when ordering parts. To enhance article comprehension an article picture-view has been embedded. Usually only single-parts have a picture-view. Press the article number and it will show.
Description	The part name used when ordering parts.
+	Indication that this module consists out of one or more sub-modules, click the symbol to jump to the sub-module page.
Qty	How many times this article is used in this (sub)module (not the total quantity in the machine)

Partlist and associated Drawings

The drawing enables you to locate parts mentioned in the part list table.

A drawing always belongs to the previous partlist. You can verify this by checking the article number at the top of the Partlist and the Drawing.

Machine number:

A machine number is configured out of three sections: example 200810043

- 2008 = the year the machine has been manufactured
- 10 = the month the machine has been manufactured
- 0043 = the production number

Ordering machine parts:

Parts can be ordered by specifying the part article-number and machine number. The machine number is shown at the top of each part list page and is punched into the machine identification plate.

Download your Part- and Usermanual(s):

Meyn offers advanced online services for its customers:

- Order spare parts.
- View and download equipment manuals.
- Have online access to our After Sales Support facilities
