

Dear Valued Customer,

Congratulations on the purchase of your new Mettler Toledo Product Inspection equipment. We are certain this machine will provide your company many years of increased throughput and optimized efficiency.

With your decision to buy from Mettler Toledo, you now have access to the entire organization and our expertise. Whenever you have a question, whether it relates to this specific unit or a general question about our family of Product Inspection equipment (metal detection, x-ray inspection, checkweighing, vision inspection, track and trace), you are invited to call our 24/7 service line at 800-447-4439. A Mettler Toledo engineer, intimately familiar with all Product Inspection equipment, will ensure that you get the help you need immediately.

Your Mettler Toledo Product Inspection equipment is supported by a dedicated staff. We will stay at the forefront of this specialized field to better support and provide the best solutions for our customers. When we find ways to improve the technology, we will strive to make it available to our existing customers. After all, you are the reason why Mettler Toledo Product Inspection continues to be the industry leader.

Thank you for your purchase, we look forward to serving you and strengthening the relationship between our organizations.

Sincerely,

Margie Custin, General Manager
Mettler-Toledo Product Inspection, North America

This manual was designed to ensure that you will get the most out of your Mettler Toledo Product Inspection equipment for many years to come. You will find useful information, not just for today, but also for the future. Please ensure this manual is available for the personnel responsible for the operation and maintenance of the equipment.
