Location : 5484  
Order nr. : 106136  
Machine nr. : 2013030172  
FO nr. : 774671  
Machine name : Plucker JMD2  
Date : 08 April, 2014

## Description & Usage of the part manual

This manual consists out of Part list tables and associated Drawings.

### *Tables with parts.*

Meyn machines are modular designed. A Part-manual starts with the top-module working its way down to the separate components (top-down). The table beneath the module-number sums up the essential parts of this module.

|                    |                                                                                                                                                                                                                              |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pos.</b>        | Part position number in the drawing.                                                                                                                                                                                         |
| <b>Article nr.</b> | The part number used when ordering parts.<br>To enhance article comprehension an <b>article picture-view</b> has been embedded.<br>Usually only single-parts have a picture-view. Press the article number and it will show. |
| <b>Description</b> | The part name used when ordering parts.                                                                                                                                                                                      |
| <b>+</b>           | Indication that this module consists out of one or more sub-modules, click the symbol to jump to the sub-module page.                                                                                                        |
| <b>Qty</b>         | How many times this article is used in this (sub)module (not the total quantity in the machine)                                                                                                                              |

### *Partlist and associated Drawings*

The drawing enables you to locate parts mentioned in the part list table.

A drawing always belongs to the previous partlist. You can verify this by checking the article number at the top of the Partlist and the Drawing.

### *Machine number:*

A machine number is configured out of three sections: example 200810043

- 2008 = the year the machine has been manufactured
- 10 = the month the machine has been manufactured
- 0043 = the production number

### *Ordering machine parts:*

Parts can be ordered by specifying the part article-number and machine number. The machine number is shown at the top of each part list page and is punched into the machine identification plate.

| Finish      | NA                                                                       | Finish                                     | NA                         |
| Weight      | NA                                                                       | Weight                                     | NA                         |
| Notes       | 1. The frame is made of stainless steel (AISI 304).                      |                                            |                            |
|             | 2. The frame is adjustable and can be used for different wire diameters. |                                            |                            |
|             | 3. The frame is suitable for use in food processing environments.        |                                            |                            |
|             | 4. The frame is made to order and lead time is approximately 4 weeks.    |                                            |                            |
