- Quote does not include Taxes, Fees, Shipping, or Installation
- Prices are good for 30 Days.
- Current Estimated Ship Date is (1-3) Days from Receipt of P.O.

Water Management Resources (WMR) warrants new equipment for a period of 12 months after start-up or 13 months after shipment, whichever occurs first. During the Warranty period, WMR will repair or replace any component supplied by WMR that fails because of a defect in materials or a defect in factory workmanship. Bearings, Couplings, Gearboxes, and Motors are subject to OEM inspections for failure determinations. Consumables (i.e., brushes, strikers, etc.) that are replaced as part of routine operation and maintenance are excluded from this Warranty. The Warranty is conditioned on proper: storage, installation, operation, and maintenance after start-up. Unauthorized repairs, modifications or alterations may void the Warranty; this determination is at WMR's sole discretion. Extended warranties are available for purchase upon request.

We appreciate the opportunity,

Braiden Griffiths
